- Software** Powerful systems, helping manage, report and track performance.

**Free Up Your Resources, Save Money, Energy and the Environment**

**Delivering Sustainable Energy Utilities and Carbon Management**

## Smart Solutions

EnergyPro Solutions Ltd (EPSL) are specialists in the delivery of effective energy & carbon management solutions, efficiently collecting & analysing data, targeting savings & improving management performance.

- **Independent**

Independent from energy suppliers, consultants and auditors, ensuring a verifiable and appropriate solution.

- **Committed**

We made a commitment in 1992 to make a real difference to the field and are delivering on this commitment as demonstrated by our successful track record and client accolades.

## Independent Case Studies

- The Warehouse Ltd. Energy Monitoring and Targeting Programme resulted in close to 50% savings in 2001 alone. (\$2 million)
- Energy Management Programme pays off for The University of Auckland - now using 41% less energy per student.

*International case studies have shown savings of 5-15% can be expected from a successful Energy Management Program.*

EnergyPro® not only empowers your energy team, but provides a solid framework and tools to achieve your wider sustainability objectives.

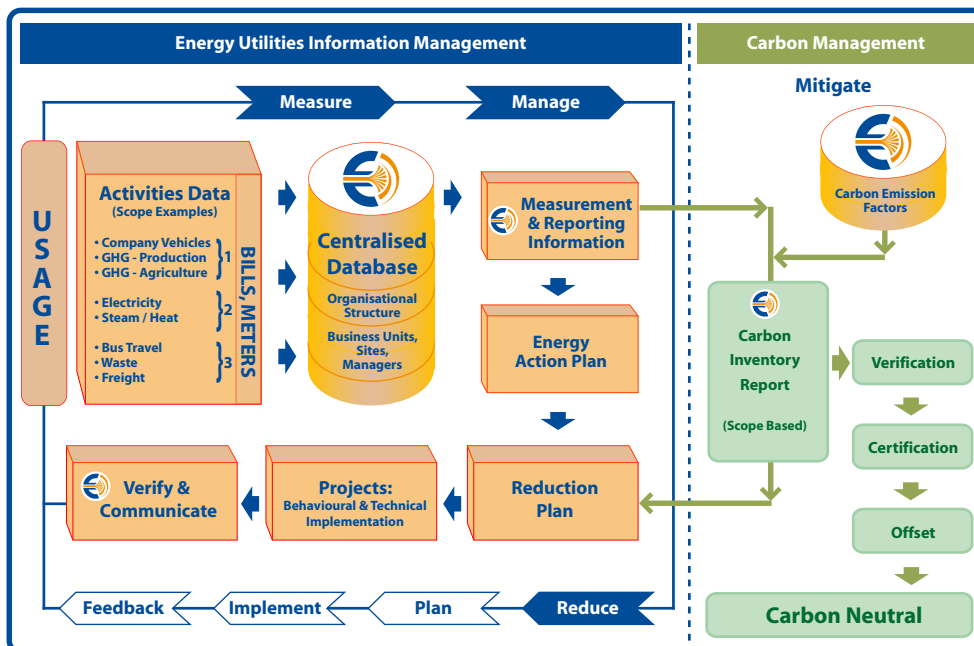

Our solutions play a key role to measure, manage and reduce usage, costs and carbon emissions, with clarity and visibility.
